

Maximising your fleet Uptime

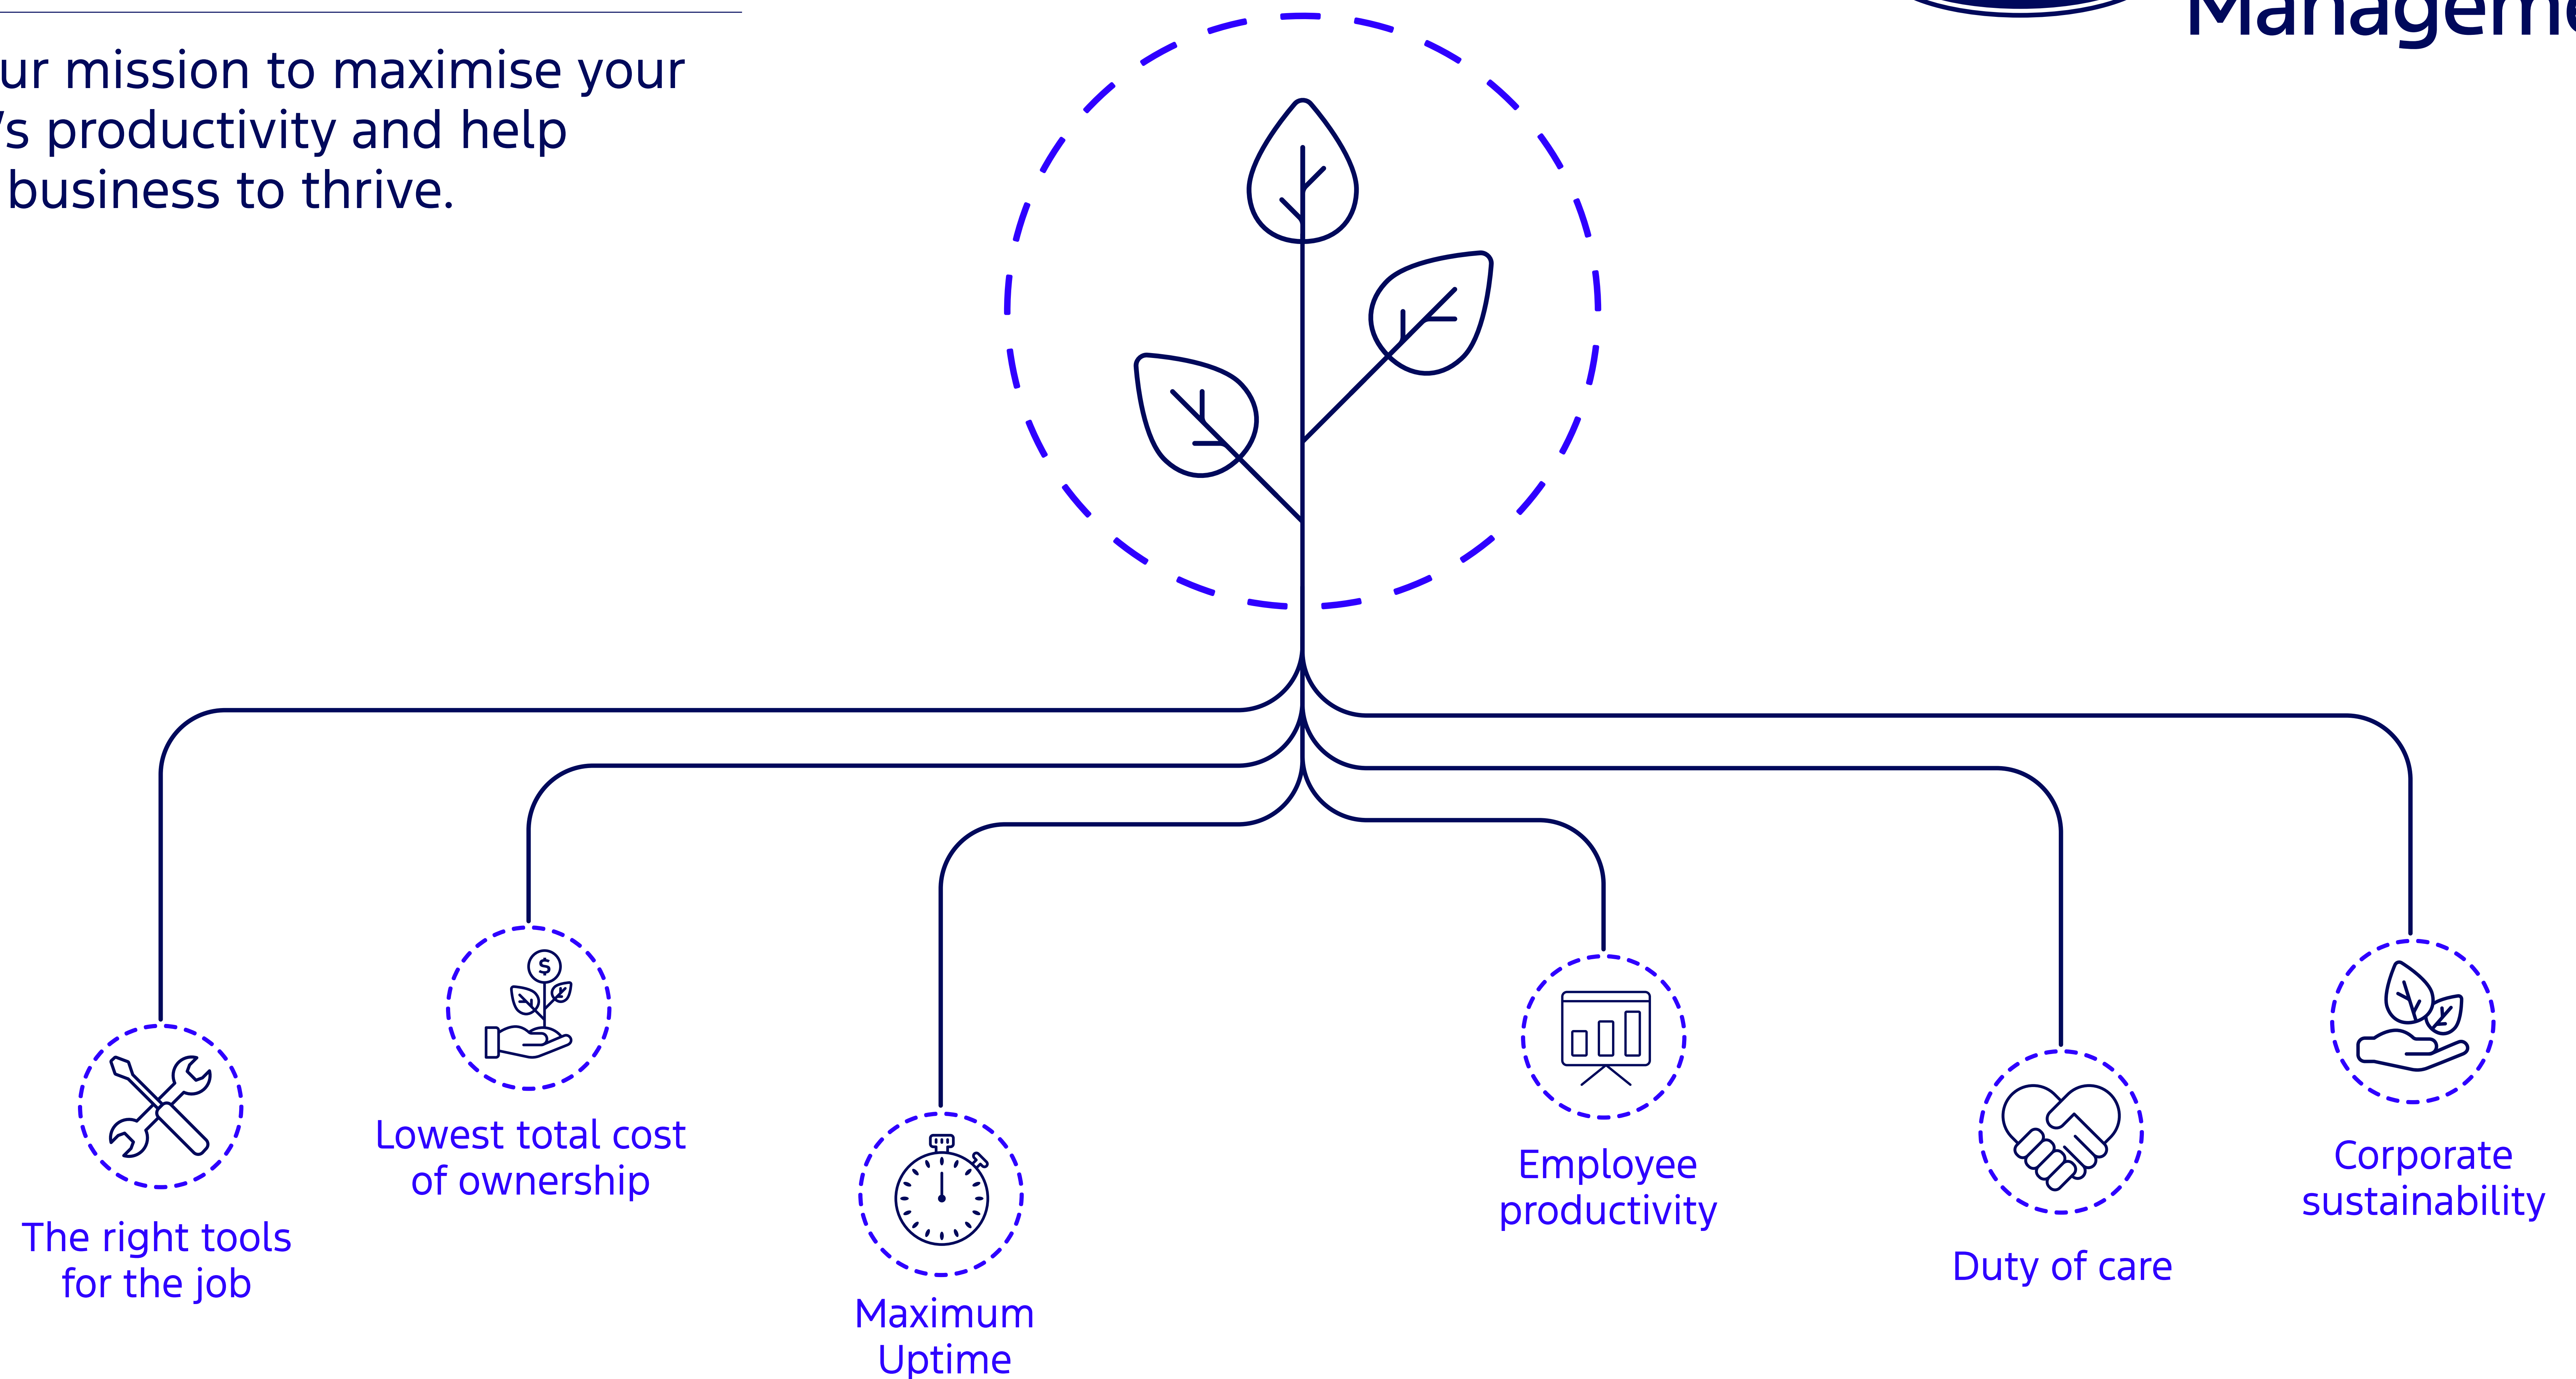

Fleet
Management

01 OUR PURPOSE

It's our mission to maximise your fleet's productivity and help your business to thrive.

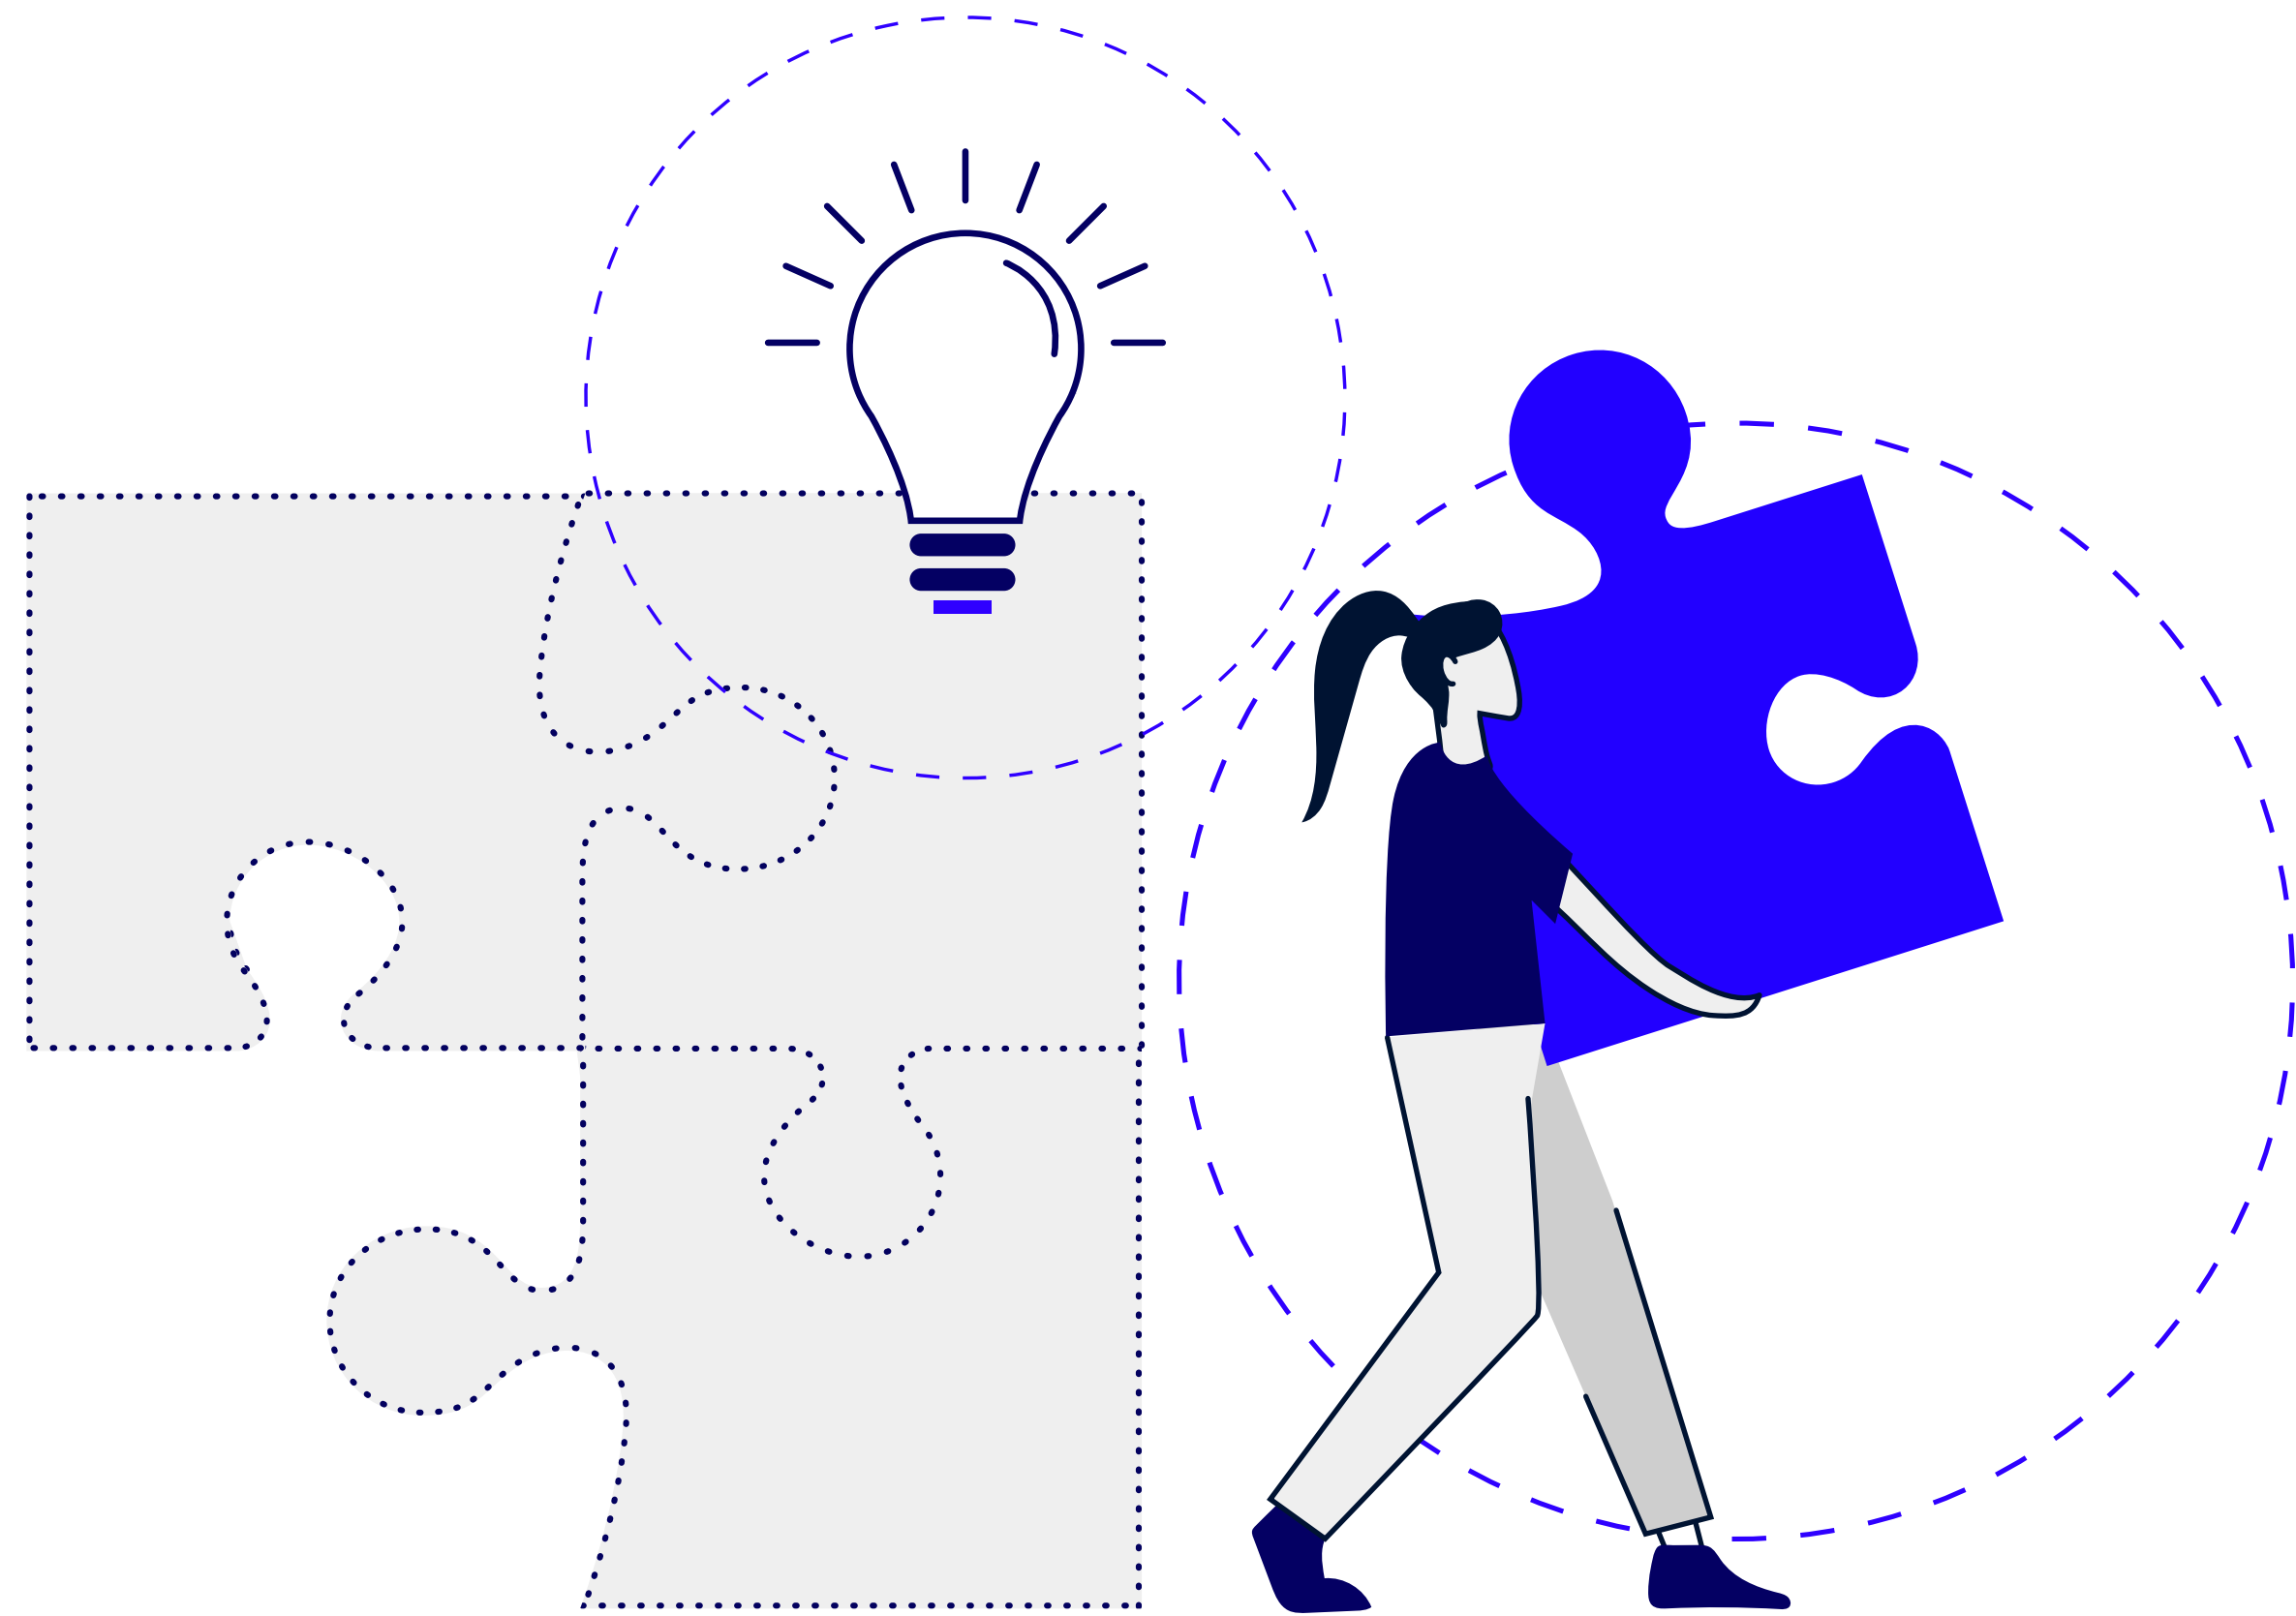

Fleet Management

02 OVERVIEW

Help your fleet to go the extra mile.

Managing a fleet is a constant juggling act. Are my vehicles driving efficiently? Are they in optimal condition? Are they compliant? FFM's Uptime solution could give you the answers.

Our mission is to keep your vehicles on the road. That's why we've created a clever proposition designed to increase fleet productivity.

Access fleet data and reporting at the touch of a button and take advantage of our dedicated team of proactive Uptime experts.

Improve Uptime. Reduce admin.

Access reporting, updates, vehicle health status and alerts, tracking, live maps & geofencing with our FleetVision platform.

Improve efficiency. Reduce unplanned off-road events.

Resource dedicated to monitoring health signals, managing off-road events, communicating with dealers and helping to arrange alternative vehicles. Let our expert Uptime team take the worry of keeping vehicles on the road out of your hands and improve your fleet efficiency.

Improve compliance. Reduce risk.

Maintaining vehicles to manufacturer recommendations protects vehicle warranty and reduces the risk of major component failures. Our team push to ensure events aren't missed, keeping your fleet legislation compliant.

03 HOW IT WORKS

Modem

All New Ford vehicles are built with an embedded modem. (Don't have just Ford product on your fleet? Don't worry, we can install a plug-in modem)*

This piece of kit is the key to collecting all of your driver and vehicle data.

FleetVision

This is the exciting bit! All of the information you need is sent from the modems in your vehicles to your FleetVision dashboard.

This means you have a 360 view of your whole fleet and can monitor, adjust and quickly respond to any issues.

Uptime Team

Our Uptime team keep tabs on your live fleet data, flagging any health alerts, arranging service and compliance events on your behalf and even helping to arrange an alternative vehicle where needed.**

*Ford Fleet Management are an authorised Ford Telematics Services Provider. Ford Pro™ Telematics Essentials is only available for Ford vehicles with an activated FordPass Connect modem. Ford Pro™ Telematics is available for Ford vehicles with a FordPass Connect modem or an eligible 3rd party Plug-In Device (product features may vary). Eligible fleet/business customers only. Ford Pro™ Fleet Marketplace T&Cs apply. Screen designs may vary

** Some of the benefits are only available as part of our 'Pro' package.

04 WHY CHOOSE FFM UPTIME?

Fleet Efficiency

- Preventative maintenance reduces costly breakdowns, saving your business time, effort and money
- Event planning improves fleet utilisation = greater return on investment
- We can bundle repairs with Service and MOT bookings, reducing off-road time
- Our Uptime team identify issues and send fault codes to dealers in advance of vehicle arrival

Productivity

- Reporting functionality providing transparency on all cases, removing the need to chase for updates
- Complete visibility of your assets
- Use FleetVision as a repository for relevant documents, such as testing certificates
- From out-of-hours mobile service bookings to arrangement of alternative vehicles, our end-to-end management prioritises the quickest possible resolution

Safety

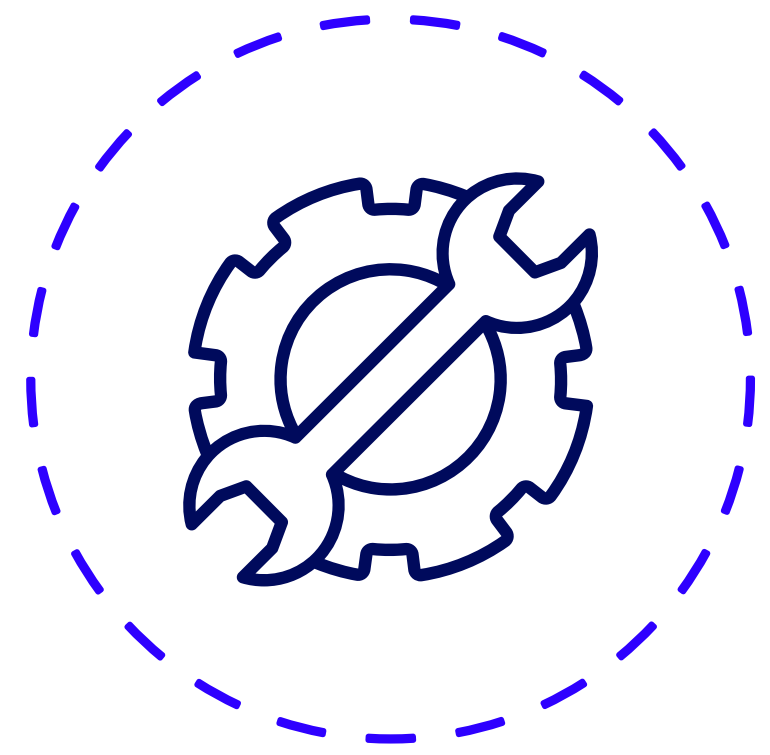

- Maintaining vehicles to manufacturer recommendations protects warranty and saves significant costs of major component failure
- Ensuring vehicles don't miss events keeps fleet legislation compliant
